PROFESSIONAL SUMMARY

Computer Science undergraduate (GPA 3.75/4.00) seeking a software engineering internship. Hands-on experience building full-stack web and cross-platform mobile applications in team settings, including a client project tested by real users, plus an AI image classification project and 1.5 years of data analysis experience at an AI-driven marketing startup. Eager to learn and contribute to a development team.

CORE SKILLS

Programming: Python, JavaScript, TypeScript, C++, C, Dart, HTML/CSS, Git
Machine Learning & Data: TensorFlow, Image Classification, Data Mining, Data Analysis; learning PyTorch, scikit-learn
Web, Backend & Mobile: React, Next.js, Node.js, Express.js, PostgreSQL, Prisma, Flutter, Firebase, Vercel
AI Tools: LLM-assisted development (e.g., Claude) for coding, debugging, and rapid prototyping
Soft Skills: Teamwork, Problem Solving, Communication, Project Management, Concept & Idea Design

EDUCATION

Bachelor of Computer Science Expected February 2028
Universitas Tarumanagara, Jakarta, Indonesia | ***GPA: 3.75 / 4.00***

SMA Dian Harapan Lubuklinggau 2021 - 2023
Science Major (IPA), Lubuklinggau, Indonesia

PROJECTS

Warung Sembako Abah Andi: Inventory Management System Feb 2026 - Jun 2026
Team of 4 | *Full-stack Developer (frontend and backend)* | *GitHub*
- Developed a full-stack web application for a grocery store to manage stock, with automatic alerts for expiring, low-stock, and overstocked items.
- Implemented Economic Order Quantity (EOQ) analysis to support restocking decisions.
- Built secure authentication (JWT, bcrypt) and image upload (Cloudinary); deployed frontend on Vercel and backend on Railway.
- Tested and validated by the shop owner and store staff in real use.
- *Tech:* JavaScript, Next.js 15, Node.js, Express.js, Tailwind CSS, PostgreSQL (Supabase), Prisma ORM, GitHub, draw.io

Z: Social Media Mobile App Aug 2025 - Oct 2025
Team of 4 | *Mobile UI / Frontend Developer* | *GitHub*
- Built a cross-platform (iOS and Android) social media app with real-time chat, posting, comments, and profile editing.
- Designed the homepage UI and implemented several core app features.
- *Tech:* Flutter, Dart, Firebase, Android Studio, GitHub

Facial Expression Classification (AI) April 2026
Course project | *Machine Learning*
- Built an image classification model that detects facial expressions (happy, sad, angry, and others) from photos, achieving accurate results.
- *Tech:* Python, TensorFlow

PROFESSIONAL EXPERIENCE

Data Analyst Feb 2024 - Jul 2025
TRIBEZ (AI-driven creative marketing platform for MSMEs) | *Full-time, hybrid (online and onsite)*
- Researched and collected data on trending and viral topics to identify what MSME marketing content needs: language style, promotion types, engaging topics, and audience interests.
- Organized data by user age group so the company's AI could generate content suited to the target age set by each user.
- Supported AI-generated social media ad captions, alongside the marketing team's video marketing content.
- *Tools:* Microsoft Excel

ACTIVITIES

Participant, Hackathon Universitas Paramadina
- Collaborated in a team of 3 to develop a solution under tight time constraints.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, Dart, HTML/CSS
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Flutter, Tailwind CSS, Prisma, TensorFlow
Databases & Cloud: PostgreSQL (Supabase), Firebase, Cloudinary, Vercel, Railway
Tools: Git/GitHub, VS Code, Android Studio, Thunder Client, draw.io, Microsoft Excel

ADDITIONAL INFORMATION

Languages: Indonesian, English
Professional Interests: AI-assisted software engineering, mobile/frontend development, data mining
Availability: 6 months – 1 year
References: Available upon request
